The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/568,835	Applicant(s) NOORDHUIS, JOEKE	
	Examiner Reginald L. Alexander	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 May 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by De'Longhi.

There is disclosed in De'Longhi a beverage making device for use with a coffee machine (hot water source), comprising: a frothing member 38 for producing a froth in the beverage; a settling chamber 45 for allowing the frothed beverage to settle, this being capable because of the use of ribs 17, surrounding an outlet 16, which delay the outlet of frothed beverage from the chamber, wherein the size of the outlet is limited compared to the opening formed by the surrounding ribs within the chamber; a brewing chamber 11 for brewing a beverage; outflow means 32, 34 for supplying a brewed beverage to the frothing member; and a guiding surface 39 and (sloped floor) in a central portion of the settling chamber for guiding a frothed beverage therealong.

In regards to the recited "restriction", the outlet 16 is restricted as compared to the opening formed by the ribs. Thus, the structural limitations of the claim have been met.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over De'Longhi.

De'Longhi discloses the claimed invention except for the recited size range of the outlet opening. It would have been obvious to one skilled in the art to construct the outlet opening of De'Longhi within the claimed size range, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

Response to Arguments

Applicant's arguments filed 5/4/2009 have been fully considered but they are not persuasive. Applicant argues that the prior art fails to disclose an outlet wherein "a size of the outlet is limited so as to form a restriction". Describing the opening in this manner is relative. An outlet size can be considered restricted if the opening which feeds the outlet is of a larger size than the outlet. In the De'Longhi reference the opening formed by the surrounding ribs, which feeds into the outlet, is larger than the outlet. Thus, the outlet can be said to be restricted.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art references to Van Der Meer et al., Brouwer et al., Brouwer and Kraan are cited for their disclosure of the state of the art.
